Why it works for you

1

You already have a client base

You already visit, advise, or provide services to restaurants. Now give them software under your own name.

2

Your margin improves as you grow

The more paying restaurants you manage, the less you pay us for each one, and the tier applies to your entire client base.

3

You don't have to develop the software

We take care of servers, backups, updates, and improvements.

Your brand, at two levels

Partner

From day one

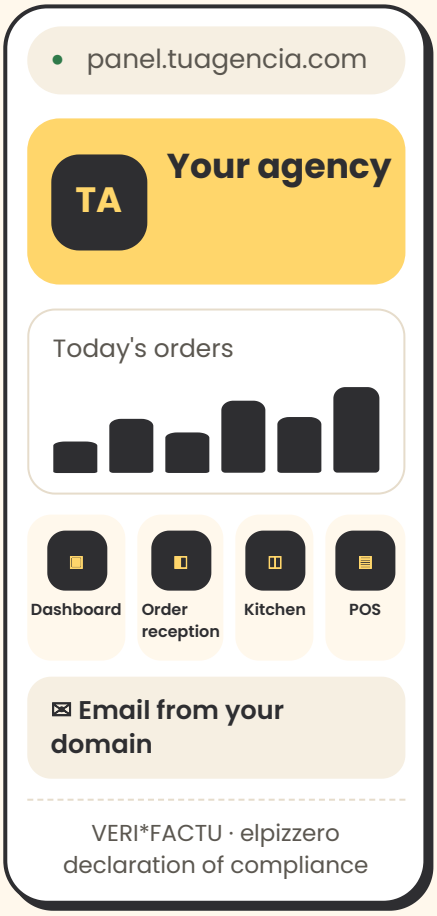

- ✓ Your name, logo, and color on your dashboard, catalog, and sign-up link.
- ✓ The restaurant sees 'Service by' and your company name, as well as an indication that the service is provided by elpizzero.

Verified partner

Full white label, subject to prior authorization

- ✓ Your restaurants' dashboard, with your branding.
- ✓ Your domain, for example panel.tuagencia.com.
- ✓ Apps with your name and icon: dashboard, order reception, kitchen, and POS.
- ✓ Platform emails, with your branding.

Verified status is granted at elpizzero's discretion. Full white labeling is activated only with its authorization, and elpizzero may withdraw it.

Your branding never appears on elpizzero's declaration of compliance or the reference to VERI*FACTU, nor on the restaurant's invoices, which are issued under its tax ID.

What you resell

One system for the entire restaurant. We keep it running and up to date; you sell it under your brand and support the customer.

Eight components, one system. You sell it; we maintain it.

Digital menu with QR

Available in 18 languages, with photos, options, allergens and prices you can update in a minute.

Online orders with no commission from elpizzero

For pickup, delivery or at the table. elpizzero charges no commission per order.

Card payments

The customer pays when ordering, and the money goes directly to the restaurant's account.

POS

Runs on Sunmi terminals, Android tablets and phones, and Windows, with a receipt printer.

Kitchen display screens

Orders arrive automatically, sorted by time, with no paper needed.

Delivery

Set delivery areas, times and minimum orders, with an app for drivers.

Tables and reservations

A floor plan, a QR for each table and reservations with customer notifications.

VERI*FACTU invoicing

Invoices with the restaurant's Tax ID; the restaurant is responsible for them. elpizzero signs the software's declaration of responsibility.

Your live margin

Based on the current tier table. You set the price; we charge a fixed fee per paying restaurant.

1 to 5	**31 €** + VAT
6 to 10	**29 €** + VAT
11 to 50	**25 €** + VAT
51 to 100	**20 €** + VAT
More than 100	**Custom**

You pay us per restaurant
€29

Total you pay us per month
€290

Gross margin per month
Before Stripe fees and your own expenses.
€300

Per year
€3,600

Tier changes, using the example price

Example price: 59 € per restaurant per month. You decide.

- Tier change: from 5 to 6 restaurants, your monthly gross margin rises from 140 € to 180 €.
- Tier change: from 10 to 11 restaurants, your monthly gross margin rises from 300 € to 374 €.
- Tier change: from 50 to 51 restaurants, your monthly gross margin rises from 1.700 € to 1.989 €.

Example, not a promise: excluding VAT and based on today's tier table. If you charge a restaurant less than our fee, you pay the difference. The fee never falls below 20 € per restaurant per month, plus VAT. Restaurants on a trial do not count.

The flow of funds

For each restaurant, each month, using the example above.

The restaurant pays you
€59 + VAT

It goes into your Stripe account
You invoice the restaurant under your tax ID, applying the relevant VAT.

Our fee is set aside
€29 + VAT
Automatically, with every payment.

Your gross margin
€30
Before Stripe fees and your own expenses.

Stripe charges its fee separately. If a payment does not cover our fee, you pay the shortfall.

Your add-ons and services: the amount is yours, less only the applicable taxes, fees, and costs.

Clear safeguards and exit options

Price guaranteed for 6 months
Your pricing table remains unchanged for at least 6 months, and you receive 90 days' notice of any change. If it no longer works for you, you can leave without penalty.

No minimum commitment for you
You can cancel a location or leave the program whenever you wish. You will not be charged again from that day onward; amounts already collected are not refunded.

If you leave, your restaurants carry on
Their orders, POS, and invoices keep working. Your charges to them are canceled that day, and each restaurant has 60 days to choose: a direct plan, another partner, or exporting its data.

Your restaurants can switch with 2 months' notice
By giving notice through their dashboard, at no cost. In the meantime, everything stays the same: you continue to manage them and collect their payments.

Each party handles its own tax matters
As the billing software manufacturer, elpizzero signs its declaration of compliance and handles questions about VERI*FACTU. The restaurant is responsible for its own invoices and taxes.

Support within 1 business day
You support your restaurants, and we support you.

What you need

- ✓ A valid company or self-employed Tax ID.
- ✓ A website or professional profile that shows what you do.
- ✓ A Stripe account in your company's name, or you can open one from your dashboard.
- ✓ Accept the program terms, including the data processing agreement.

Billing in the Basque Country and Navarre follows its own system: ask us before selling there.

This presentation is a commercial summary. The contract consists of the Partner Program Terms and Conditions and the Data Processing Agreement for Partners; if there is any discrepancy, those documents prevail. Current program terms: version 2026.11.12.

elpizzero is a trading name of Ángel Rives García · tax ID 15415960A · Calle Redován 3, 03350 Cox (Alicante), España · hola@elpizzero.com · elpizzero.com/aviso-legal.php
